The Grind

Provided by EELP, Inc.

February 9th Edition

We are pleased to introduce the

EXCITING SLEEK DESIGN

of the

AL3 & AL4

The AL3 & AL4 is constructed of one piece of die cast aluminum housing and is built for durability.

The multi faceted aluminum reflector is adjustable for multiple distribution types in the field.

The electrical wiring and the optics are contained in a sealed chamber and the lens frame is hinged for easy hands free re-lamping.

Please visit our website to download the
AL3 & AL4 Cut Sheet

****Reminder****
